

What is Wriggle Connect - Online Training?

Wriggle Connect - Online Training is an online training platform designed to support teachers with the demands of professional learning. Using bite-sized and engaging content, we will guide teachers through online courses that will ensure you feel confident and comfortable using technology for teaching and learning.

Our expert educator team have developed bespoke video 'Blasts' that demonstrate how you can use iPad, Office 365, SeeSaw and so much more! With over 500 short video Blasts (2-5 minutes each), we have all of the bases covered. Our training content is created by and for Irish teachers who relate what they are demonstrating directly to real world contexts.

We feel it is now more important than ever for teachers to have access to reliable, informative and safe forms of professional learning that allows you to upskill on topics like Blended Learning and the Flipped Classroom.

Wriggle Connect will be available to schools and teachers from August so click on the link below to find out more...

OLD

COSTLY: A single onsite training session for a group of 20 teachers can easily cost €500+.

DID IT WORK?: It can be difficult to determine if individual training sessions were worthwhile for the entire group.

OFF COURSE: Everyone progresses at a different pace so individuals can get lost in larger groups.

RECALL: The Forgetting Curve shows that we lose 60% of what we are taught within 2 days!

TIME POOR: A teacher's day is already extremely busy so scheduling face-to-face training can be problematic.

NEW

SAVINGS: Up to 60% cheaper on Wriggle Connect.

MEASURE SUCCESS: Individual progress is tracked so everyone can see how well they are doing. Time spent can also go towards Croke Park hours.

PERSONALISED: The training is self-paced so the learner can watch it back as many times as they like.

RELAX: Our bite-sized videos and built-in knowledge checks make it easier to retain the material.

ANYTIME, ANYWHERE: Our platform allows you to access your training content 24/7, from any device.
